Distribute

The strength of a chain is as reliable as its weakest link; all parts form an inseparable unity.

As boring as it may seem, in order for it to go through the pipeline, compressing, publishing data, creating content to begin with, gathering knowledge, bringing it together is super-essential for it to be effective eventually.

~~We need to develop a working knowledge and experience in the field of distribution. Aligned to the core of the whole endeavor.~~

~~Where and how is the audience going to find it? Why? In what shape? How long? Where? Who is going to tell them about it? Who is who? Who is they?~~
